LIST OF CONTENTS

NUMBER 1

M. Tanaka and **A. N. Bercin**	1	Free vibration solution for uniform beams of non-symmetrical cross section using Mathematica
C. K. Lee and **R. E. Hobbs**	9	Automatic adaptive finite element mesh generation over arbitrary two-dimensional domain using advancing front technique
J. Pietrzak	35	Pareto optimum tests
S. Klinkel, F. Gruttmann and **W. Wagner**	43	A continuum based three-dimensional shell element for laminated structures
O. S. Hopperstad, B. J. Leira, S. Remseth and **E. Trømborg**	63	Reliability-based analysis of a stretch-bending process for aluminium extrusions
Z. Zhao and **S. Lan**	77	Boundary stress calculation—a comparison study
M. J. Kontoleon, E. S. Mistakidis, C. C. Baniotopoulos and **P. D. Panagiotopoulos**	87	Parametric analysis of the structural response of steel base plate connections
W.-X. Ren, X. Tan and **Z. Zheng**	105	Nonlinear analysis of plane frames using rigid body-spring discrete element method
	121	Erratum
	I	Calendar

NUMBER 2

F. H. Hamdan	123	Near-field fluid–structure interaction using Lagrangian fluid finite elements
S. S. Al-Mosawi and **M. P. Saka**	143	Optimum design of single core shear walls
M. H. Imam	163	Optimum floorplan topology for minimizing the damaging effects of live loads in building structures
T. Belytschko and **M. Fleming**	173	Smoothing, enrichment and contact in the element-free Galerkin method
H. E. Pettermann, A. F. Plankensteiner, H. J. Böhm and **F. G. Rammerstorfer**	197	A thermo-elasto-plastic constitutive law for inhomogeneous materials based on an incremental Mori–Tanaka approach

F. Giambanco 215 Elastic plastic analysis by the asymptotic pivoting method

I Calendar

NUMBER 3

M. G. Sainsbury and Q. J. Zhang 239 The Galerkin element method applied to the vibration of damped sandwich beams

B. Lallemand, P. Level, H. Duveau and B. Mahieux 257 Eigensolutions sensitivity analysis using a sub-structuring method

G. Davì and A. Milazzo 267 Bending stress fields in composite laminate beams by a boundary integral formulation

T. Krauthammer and S. E. Swartz 277 Observed finite element capabilities and limitations from multi-team simulations of three concrete shell structures

X. Wang and J. Zhou 293 An accelerated subspace iteration method for generalized eigenproblems

M. Ravikumar and A. Chattopadhyay 303 Integral analysis of conveyor pulley using finite element method

G. H. Little 333 Efficient large deflection analysis of rectangular plates with general transverse form of displacement

Technical Note

G. H. Little 353 Large deflections of rectangular plates with transverse edges remaining straight

I Calendar

III Announcement

NUMBER 4

Z. Ji, K. Deng, A. W. Davies and F. W. Williams 359 Numerical modelling of thermal destruction of cylindrical shells with internal pre-pressure under laser irradiation

D. Johnson 371 Rigid–plastic collapse of grids with bending/torsion interaction and distributed loading effects

J. G. Leahy and A. A. Becker 383 The numerical treatment of local variables in three-dimensional frictional contact problems using the boundary element method

R. Karoumi	397	Some modeling aspects in the nonlinear finite element analysis of cable supported bridges
Q. J. Zhang and **M. G. Sainsbury**	413	On the exact reduction and eigensolution for the Galerkin element method
H. Shakourzadeh, Y. Q. Guo and **J. L. Batoz**	423	Modeling of connections in the analyses of thin-walled space frames
K. Yamamoto and **M. Kawahara**	435	Structural oscillation control using tuned liquid damper
H. Ding and **J. Liang**	447	The fundamental solutions for transversely isotropic piezoelectricity and boundary element method
J. Wang, W. Ren, D. Zou, Z. Qian and **S. Liu**	457	Processing mechanics for flip-chip assemblies
P. Subramanian	469	Finite element analysis of thick homogeneous plates
	I	Calendar

NUMBER 5

Z. Ye	481	Application of Maple V to the nonlinear vibration analysis of circular plate with variable thickness
J.-M. Désir, M. R. B. Romdhane, F.-J. Ulm and **E. M. R. Fairbairn**	489	Steel–concrete interface: revisiting constitutive and numerical modeling
S. Maza, F. Noel and **J. C. Leon**	505	Generation of quadrilateral meshes on free-form surfaces
P. C. Pandey and **P. Bakshi**	525	Analytical response sensitivity computation using hybrid finite elements
Q. Z. Xiao, B. L. Karihaloo, Z. R. Li and **F. W. Williams**	535	An improved hybrid-stress element approach to torsion of shafts
N.-E. Wiberg, R. Bausys and **P. Hager**	565	Adaptive *h*-version eigenfrequency analysis
I. Takahashi	585	Vibration and stability of non-uniform cracked Timoshenko beam subjected to follower force
	593	Erratum
	I	Calendar

NUMBER 6

K. Davey and **M. T. Alonso Rasgado**	595	Semi-analytical integration of sub-parametric elements used in the BEM for three-dimensional elastodynamics
A. A. Khdeir and **J. N. Reddy**	617	Free vibrations of laminated composite plates using second-order shear deformation theory
M.-H. Yu, S.-Y. Yang, S. C. Fan and **G.-W. Ma**	627	Unified elasto-plastic associated and non-associated constitutive model and its engineering applications
G. Zloković, T. Maneski and **M. Nestorović**	637	Group theoretical formulation of nonsymmetrical systems by the group supermatrix procedure
A. Landenberger and **A. El-Zafrany**	651	Boundary element analysis of elastic contact problems using gap finite elements
M. A. Foda	663	Influence of shear deformations and rotary inertia on nonlinear free vibration of a beam with pinned ends
R. D. Kangwai, S. D. Guest and **S. Pellegrino**	671	An introduction to the analysis of symmetric structures
M. A. Bradford and **N. Abdoli Yazdi**	689	A Newmark-based method for the stability of columns
	I	Calendar
